

NEEM WOOD CHEWS FOR DOGS

Product concept — 100% natural neem wood dental chews, by Boldpartners (Bangladesh)

Eurobempet presents a range of 100% natural neem wood chews for dogs, handcrafted by Boldpartners in Bangladesh. Made from sustainably sourced neem wood (*Azadirachta indica*), these chews harness one of nature's most powerful antibacterial trees — used for centuries in traditional dental care across Asia. A single-ingredient, hypoallergenic, eco-friendly product that supports oral health while satisfying dogs' natural chewing instinct. A clean, differentiated alternative to synthetic chews and rawhide, ready for private label development.

KEY USP's

Naturally Antibacterial

Neem wood contains natural antibacterial and antifungal properties that support oral hygiene and help prevent plaque and tartar buildup.

Hypoallergenic & All Breeds

Ideal for dogs with allergies or sensitivities — free from gluten, meat, and dairy.

Calming & Engaging

Promotes relaxation and reduces anxiety by providing a healthy outlet for chewing behavior.

Supports Dental Health

Regular chewing helps clean teeth, massage gums, and reduce bad breath naturally.

Long-Lasting Chew

Tough and durable, neem sticks keep dogs engaged for longer, satisfying their natural chewing instincts.

Eco-Friendly & Biodegradable

A sustainable alternative to plastic or synthetic chews, gentle on the environment.

Product details & concept gallery

Neem Tree — Origin

Neem Wood Chews — basket

Product — packaged chew

COMPOSITION

100% neem wood (*Azadirachta indica*). Single ingredient — no additives, no chemicals, no artificial ingredients.

SUITABLE FOR

All dog breeds and sizes from 6 months+. Especially recommended for dogs with allergies or food sensitivities.

ORIGIN & MANUFACTURING

Sustainably sourced and handcrafted by Boldpartners, Bangladesh. Part of the Eurobempet global manufacturing network.

ABOUT NEEM WOOD

Neem (*Azadirachta indica*) is native to South Asia and has been used for centuries in traditional medicine and dental hygiene. Neem twigs have long been used as a natural toothbrush across India and Bangladesh — one of nature's most powerful antibacterial plants.

KEY DIFFERENTIATORS VS COFFEE WOOD

- Natural antibacterial & antifungal properties
- Deep traditional dental hygiene heritage
- 100% single-ingredient, hypoallergenic
- Biodegradable & eco-friendly
- Bitter taste profile preferred by some dogs

FUNCTIONAL BENEFITS AT A GLANCE

Benefit	How it works	Active property
Antibacterial oral care	Inhibits bacteria causing plaque & tartar	Natural neem compounds
Dental cleaning	Chewing action scrubs teeth & massages gums	Firm wood fiber texture
Allergy-safe	Single ingredient, no meat/gluten/dairy	100% neem wood only
Mental stimulation	Long-lasting chew satisfies instinct & calms	Durable wood structure
Eco credentials	Biodegradable, sustainably sourced	Natural wood, no synthetics
